

# DR GRISHA SZEPI

## PERSONAL INFORMATION

<i>github</i>	<a href="https://github.com/gszep">github.com/gszep</a>
<i>email</i>	<a href="mailto:gregory.szep@gmail.com">gregory.szep@gmail.com</a>
<i>phone</i>	+44 7956 329010

## SUMMARY

Experienced researcher of 10 years working within biomedical and computational academic research groups and software industry. Published works accumulated 165 citations (h-index 3). Expertise in multi-omics, computational modelling and machine learning for biomedicine.

## EDUCATION

<i>Biophysics &amp; Machine Learning Doctorate</i>	<i>09/2017 - 03/2022</i> University of London, King's College <i>PhD</i> · Randall Division of Cell & Molecular Biophysics Building novel machine learning algorithms for the inference of state-space structures in dynamical systems, with applications in developmental and synthetic biology. Writing software in Python and Julia in collaboration with Station B at Microsoft Research Cambridge. Published works in NeurIPS Proceedings, Natural Computing, Nature Comms and JuliaCon. Attila CSIKÁSZ-NAGY · <a href="mailto:attila.csikasz-nagy@kcl.ac.uk">attila.csikasz-nagy@kcl.ac.uk</a> Neil DALCHAU · <a href="mailto:ndalchau@microsoft.com">ndalchau@microsoft.com</a>
<i>Physics Masters</i>	<i>09/2011 - 05/2015</i> University of London, King's College First Class · <i>Physics MSci</i> · School of Natural & Mathematical Science Focus on non-equilibrium statistical mechanics, information theory and complex networks. Masters project involved using the Keldysh formalism to investigate angular dependence of molecular current-voltage characteristics. Project Supervisor: Prof. Lev KANTOROVICH · <a href="mailto:lev.kantorovich@kcl.ac.uk">lev.kantorovich@kcl.ac.uk</a>
<i>Exchange Year</i>	<i>08/2013 - 06/2014</i> University of California, Berkeley GPA: 3.7 · <i>Physics Major</i> · College of Letters & Science Attended lectures at the Redwood Center for Theoretical Neuroscience. Expanded knowledge on analytical mechanics, special relativity, solid state physics and machine learning. Duration of stay motivated academic path and insight into different academic and industrial cultures. Study Abroad Tutor: Nicola BONINI · <a href="mailto:nicola.bonini@kcl.ac.uk">nicola.bonini@kcl.ac.uk</a>

## WORK EXPERIENCE

<i>Microsoft</i>	<i>09/2017 - 09/2021</i> Doctoral Researcher, CAMBRIDGE Our aim was to build a new platform for biological programming which would help industry partners, like Oxford Biomedica, scale their efforts to design, build and test bio-manufacturing pipelines. Developed expertise with single cell multi-omics datasets: proteomics (MS/MS), transcriptomics (scRNA-seq) and metabolomics (MS) and flow cytometry data. Supervisor: Neil DALCHAU · <a href="mailto:ndalchau@microsoft.com">ndalchau@microsoft.com</a>
<i>Flux</i>	<i>11/2019 - 12/2020</i> Senior Data Scientist, LONDON Delivering business intelligence and consumer analytics on receipt-level transaction data to merchant partners. Applied machine learning with Scala, Python and PostgreSQL; building tools for A/B testing and actionable reports. Chief Executive Officer: Matty CUSDON-ROSS · <a href="mailto:matty@tryflux.com">matty@tryflux.com</a>

<i>Birds.ai</i>	11/2016 - 11/2017	Research Engineer, DELFT	Development and maintenance of drone image analysis pipeline for agricultural surveillance and industrial inspection. Applied machine learning techniques - convolutional neural networks - deployed scalable and secure web applications using Amazon Web Services. Chief Executive Officer: Camiel VERSCHOOR · <a href="mailto:camiel@birds.ai">camiel@birds.ai</a>
<i>Institute of Science and Technology</i>	09/2015 - 11/2016	Graduate Researcher, VIENNA	Rotations in cell migration and biochemistry groups lead to investigation of non-equilibrium responses of Lamellipodial Actin and in vitro reconstituted FtsZ:FtsA vortexes. Used Kinetic Monte-Carlo and deterministic rate equation approaches to model actin polymerisation. Published works in Cell Press. Dr. Med. Michael SIXT · <a href="mailto:msixt@ist.ac.at">msixt@ist.ac.at</a> Prof. Karsten KRUSE · <a href="mailto:k.kruse@physik.uni-saarland.de">k.kruse@physik.uni-saarland.de</a>
<i>NASA Ames Research Centre</i>	07/2014 - 09/2015	Research Intern, NASA AMES SILICON VALLEY	Coding of unsupervised machine learning algorithms to classify sleep stages on high resolution single channel electroencephalogram (EEG) recordings. Extraction of biomarkers related to neurophysiological disorders and development of communication software. Chief Executive Officer: Dr Philip Low · <a href="mailto:philip@neurovigil.com">philip@neurovigil.com</a>
<i>King's College London</i>	06/2013 - 08/2013	Research Studentship, KING's COLLEGE LONDON	Simulation of photon transport in random lasing process. Collection and analysis of data from experiment. Presentation of findings and evaluation as member of research team. Research Supervisor: Dr Riccardo SAPIENZA · <a href="mailto:riccardo.sapienza@kcl.ac.uk">riccardo.sapienza@kcl.ac.uk</a>
<i>Camden Market</i>	Sep-Dec 2012	Market Stall Owner, CAMDEN MARKET	Managing market stall in tourist area of north London selling 3D IQ puzzles made of wood and bamboo. Creative presentation and sales to young and old audiences. Financial planning. Supplier Contact: Ben MELDRUM · <a href="mailto:ben@professorpuzzle.com">ben@professorpuzzle.com</a>

#### COMPUTER SKILLS

<i>Intermediate</i>	AWS, Scala, Continuous Integration, C++, PostgreSQL, Lua, Wolfram Mathematica
<i>Advanced</i>	Latex, Git, Linux Server Administration, NodeJs, Python, Julia, D3.js, WegGL
<i>Datasets</i>	Flow Cytometry, Proteomics (MS/MS). Transcriptomics (sc-RNASeq), Metabolomics (MS)

#### LANGUAGES

<i>Intermediate</i>	Russian, French
<i>Advanced</i>	English, German

#### WORKS

<i>Published</i>	Szep, G. et al. 2021. Advances in Neural Information Processing Systems Parameter Inference with Bifurcation Diagrams.

#### AWARDS & QUALIFICATIONS

- Awards* 2018 · Microsoft Research PhD Scholarship  
2014 · Study Abroad Student Award – King’s College London  
2013 · The Gordon Rogers Scholarship - Top 5 Performing Students  
2013 · Andrewes Prize - Best Examination Performance  
2012 · Dillon Prize - Best Examination Performance
- Qualifications* 2016 · Electron Microscope Training - Institute of Science & Technology  
2013 · Basic Laser Safety Certificate - King’s College London  
2012 · Kids Ski Instructor Certificate - Swiss Snowsports
